SUMMARY

Software Engineer with 3+ years of experience building scalable web applications and digital solutions, specializing in Angular-based front-end development and full-stack application delivery. Currently working on healthcare platforms, enterprise dashboards, and modern web systems focused on performance, usability, and reliability. Experienced in TypeScript, API integrations, cloud deployments, AWS services, hosting, and building maintainable architectures with clean, efficient code. Passionate about solving complex problems, improving systems, and delivering impactful products.

TECHNICAL SKILLS

- **Front-End:** HTML | CSS | JavaScript | TypeScript | Angular 17+ | React
- **UI & Styling:** Tailwind CSS | Bootstrap | MUI | Golden Layout (dynamic draggable/resizable panels)
- **Back-End & APIs (Working Knowledge):** Node.js | Laravel | REST APIs | API Integration
- **Databases:** MySQL | Firebase
- **Tools & Platforms:** Git & GitHub | Vercel | Figma/PSD to Code | Postman | Firebase Console | Cursor AI
- **Integrations & Services:** Stripe Payments | Google Authentication | Firebase Notifications
- **State Management & Architecture:** RxJS | SPA Architecture | Component-Based Design | Responsive Design
- **Other:** Authentication Systems | Performance Optimization | Version Control

PROFESSIONAL EXPERIENCE

Angular Developer - Anchors Tech Aug 2025 - Aug 2026
– Johar Town, Lahore, Punjab, Pakistan

- Developed a healthcare management dashboard with appointment scheduling, patient records, multi-location booking, and insurance integration using Angular 19.
- Built real estate platforms with Figma-to-code conversion, interactive Mapbox maps, multi-step forms, and dynamic PDF generation.
- Implemented reusable components, Angular Material UI, JWT authentication, Firebase integration, and real-time notifications with Socket.io.
- Optimized application performance, achieving 90%+ Lighthouse scores and integrating AI chatbots with n8n automation workflows.

Angular Developer - Anchors Tech (5-month Internship) Apr 2025 - Aug 2025
– Johar Town, Lahore, Punjab, Pakistan

- Developed responsive web applications using Angular, TypeScript, and Bootstrap with a focus on clean architecture and reusable components.
- Converted Figma wireframes into pixel-perfect UIs and integrated REST APIs for dynamic data handling.
- Collaborated in Agile workflows, performed unit testing, and used Git/GitHub for version control.

Front-End Developer - AlphaNuix Technologies Dec 2023 - Mar 2025
– Layyah, Punjab, Pakistan

- Developed responsive web applications using **React and TypeScript**, focusing on modern UI patterns.
- Built reusable components and integrated REST APIs for seamless data flow.
- Collaborated with backend teams (PHP/MySQL) to deliver full-stack features.
- Performed debugging, testing, and cross-browser optimization.

PROJECTS

Blog CMS | Decoupled & Monolithic Content Management System -Personal/Full Stack Project

- Implemented advanced content management features including page builder, media library, post scheduling, SEO automation, threaded comments, and newsletter subscriptions.
- Built secure authentication with Laravel Sanctum, OTP-based 2FA, refresh-token rotation, and role-based access control supporting multiple user roles.
- Designed scalable REST APIs, Redis-powered background jobs, and reusable Angular services for responsive and high-performance user experiences.
- **Tech Stack:** Laravel 11, PHP 8.2+, Angular 19, TypeScript, MySQL, Redis, Tailwind CSS, Sanctum, RBAC

Stepping Stone Therapy | Pathways EHR | [Live Link](#)

- Anchors Tech

- Built a full-featured **medical practice management system** with clinician availability for appointment scheduling, patient records, multi-location booking, and insurance provider integration.
- Core features include OPD appointments, provider availability management, insurance integration, clinical notes, patient intake workflows, and real-time notifications.
- Built interactive analytics dashboards with Chart.js, PDF report generation, multi-language support (i18n), and role-based access control and responsive UI with Angular Material and Bootstrap.
- Tech Stack:** Angular 19, TypeScript, Angular Material, Bootstrap 5, Firebase, Socket.io, Chart.js, RxJS.

FirstCall | TeleHealth EHR | [Live Link](#)

- Anchors Tech

- Developed a multi-role healthcare platform with patient management, appointments, encounters, and analytics modules
- Implemented role-based access control (RBAC), custom guards, and interceptors for secure authentication
- Built responsive UI with Angular Material, Bootstrap 5, Chart.js, and SweetAlert2 for enhanced UX
- Created reusable components, forms with validation, and state management using RxJS observables
- Tech Stack:** Angular 19, TypeScript, Angular Material, Bootstrap 5, Firebase, Chart.js, RxJS.

Budget Plan | Personal Finance & Expense Management Platform

-Personal/Full Stack Project

- Built a full-stack finance management platform enabling users to track expenses, budgets, income, savings, debts, and multiple wallets through interactive dashboards.
- Developed REST APIs, JWT authentication, RBAC, and signal-based state management using Angular, Express.js, Node.js, and MySQL.
- Integrated Google OAuth, Stripe subscriptions, Firebase Cloud Messaging, Excel exports, and AI-powered financial insights.
- Implemented secure backend architecture with Joi validation, centralized error handling, scheduled jobs, rate limiting, and scalable database workflows.
- Tech Stack:** Angular 18, TypeScript, Express.js, Node.js, MySQL, Tailwind CSS, JWT, Stripe, Firebase, Google Generative AI.

Personal Portfolio & Admin Platform

-Personal/Full Stack Project

- Designed and developed a full-stack portfolio platform featuring a responsive Angular frontend, secure admin dashboard, project showcase, blog system, analytics, and scheduling tools.
- Built an AI-powered assistant integrating Google Gemini, OpenRouter, and Ollama with automatic fallback handling and custom command execution.
- Implemented WebRTC video calling, Socket.IO real-time communication, screen sharing, collaborative notepad synchronization, and live visitor tracking.
- Developed secure backend services with JWT authentication, email OTP-based 2FA, meeting scheduling, email notifications, and administrative content management.
- Tech Stack:** Angular 17, TypeScript, Node.js, Express.js, Socket.IO, WebRTC, JWT, Joi, Nodemailer, Google Gemini AI, OpenRouter, FullCalendar.

EDUCATION

Bachelor of Science in Information Technology (BS IT)

Sep 2020 – Sep 2024

– Government College University Faisalabad (GCUF), Faisalabad, Punjab, Pakistan

Intermediate in Computer Science (ICS)

May 2018 – July 2020

– Superior College, Layyah, Punjab, Pakistan

Hobbies

- Exploring AI & emerging technologies
- Building side projects
- Learning new software architectures
- Testing new tools and platforms
